

The Sad Old Gits Tadcaster Run

April 2008

This was the first run out for T'UNDERBIRD 3 which is the new Old Gits Mobile High Speed Emergency Cardiac Support Vehicle (see below behind the Raleigh-Run-About-Trying-To-Start-The Sodding-Thing). I am pleased to say it was not needed on the run - which is just as well as it was left for ten minutes unattended in Tadcaster and someone had the wheels off and away.

A number of OI Gits turned up, one even brought a camera, hence the pictures. Unfortunately none of them wrote anything to accompany the article so please feel free to make up your own story line.

To help you with this please consider the following:

1. Tadcaster
2. Raining
3. OI Gits
4. Public House

Please Note: Mr Frank Kilmore's entry was refused this year following his performance at the last event where his cheerful disposition effectively ruined the day for a number of the sub-sections regular riders.
