

The 2010 Coast To Coast Run

Absolutely biting wind and rain. Seventy riders signed, 61 bikes on the road. Large number of Cyclomasters and rather a lot of PC50s. Group of Fizzys, autocycles, two blokes from France, in fact lots and lots of bikes of every conceivable type travelling at various speeds strung out over many miles. Grumpy sighted at various points with his bike in bits - who would have thought you could hear a mad Yorkshireman by the side of the road swearing from the inside of a Honda Civic going past at 60 mph with the windows closed and the radio on! By the first stop the the wind had dropped and the sun was nearly visible - looks to be the biggest C to C yet - what a joy.
